coloured panels

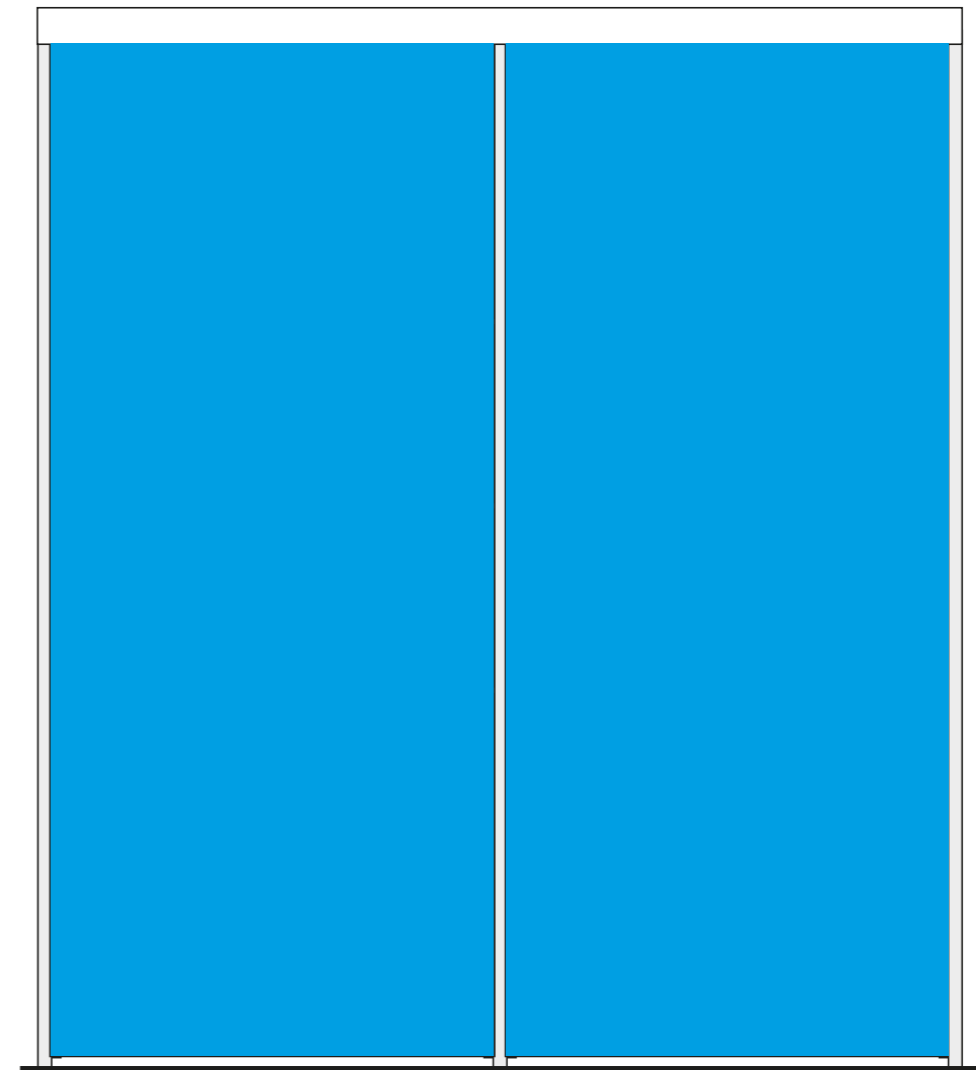

## adding colour to your stand

There are three ways to add re-usable coloured wall panels to your Frankfurt system.

Firstly 930mm wide panels placed behind the shelving. Secondly wider 970mm panels which will cover the shelving slots. Finally it is possible to completely cover the walls with colour, but these last two options will not allow for shelving to be added to the covered walls.

Panels placed behind the shelving  
930mm x 2250mm

Panels with NO SHELVING  
970mm x 2250mm  
It is also possible to make the panels  
cover the centre poles, if required.

## adding colour to your stand

There are three panel types

1. **Budget panels** - Coloured foamex  
These have a very small range of available colours
2. **Vinyl panels** - vinyl covered foamex  
A larger range of colours are available
3. **Printed panels** - printed straight to the foamex panel  
These can have any colour or design printed direct to the panel

Options 1 and 2 can also have simple logos and type applied, i.e. the company logo to the top of the panel just above the shelving.

The full list of available colours are shown over the next two pages. To help you get a more accurate colour guide we have cross referenced the vinyl colours with its nearest Pantone colour.

For printed panels we can not guarantee an exact match to specific spot colours. We can produce colour samples, but due to the production methods, these will be charged for, please call us to discuss further.

## budget panels - coloured foamex

In most cases the vinyl colours can not be matched exactly to a pantone reference.  
So PLEASE NOTE all the colours and pantone numbers shown are for guidance only.

These colours are matt but a range of gloss colours are available upon request.
